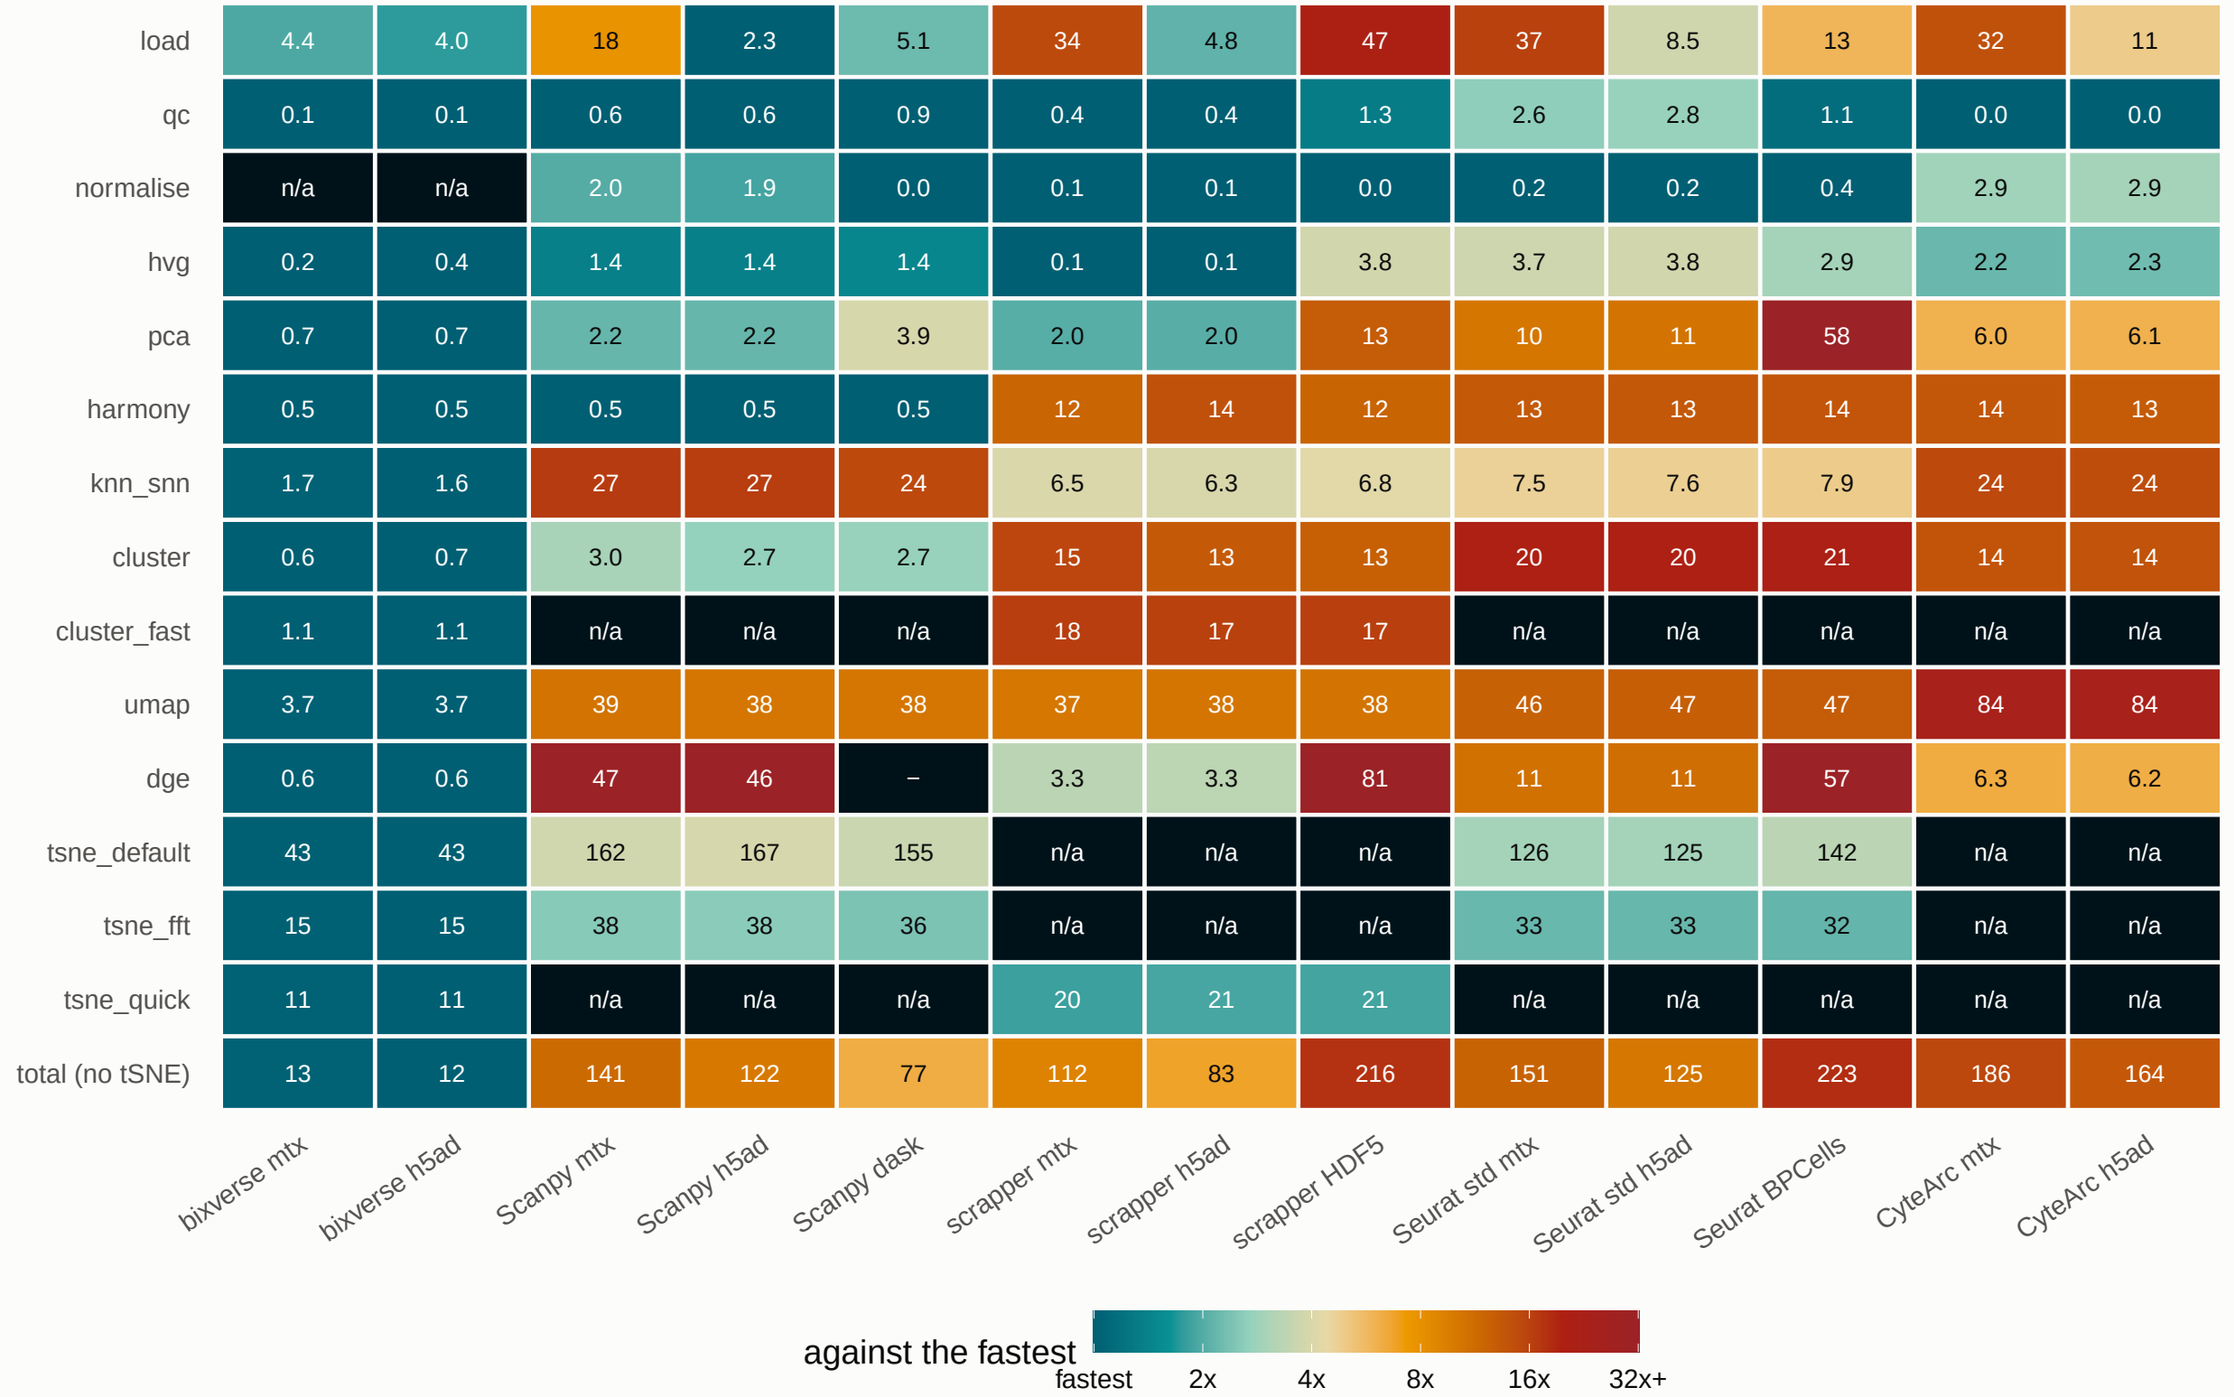
Wall time per step: Splat simulation, 100k (96,342 cells)

Seconds per step. Colour is the ratio to the fastest run that finished that step at that size (times under 1 s count as 1 s), capped at 32x.



Black: n/a (step not in that framework), OOM or TIMEOUT where the run died, − not reached.
Scanpy dask has no DGE step. Docker runs only; the native bixverse runs are in their own table.
bixverse CPU tSNE builds its kNN with IVF from 500k (kmknn at 100k). (qd) steps are not in the total.
